

A VISUAL SYSTEM TO Communicate, Collaborate and Compete

InFocus
Collaboration That Works

The Power of Meeting Face-to-Face No Matter Where You Are

The success of collaboration depends on the strength of the relationships among your team members. One research study after another shows that **nothing builds strong relationships better than face-to-face interactions.**

Telecommuters, outside consultants, and remote employees working together in different cities and countries, or even other parts of the world, play vital roles in your organization. The planning, time and energy required for business travel, let alone the cost, can hinder the success of an organization's communication.

Instead of transporting members of your team all over the world, transport your team to a single environment with InFocus. Tools and services from InFocus work together seamlessly to **promote teamwork, create synergy and drive success.**

- Enable visual, social, natural interaction
- Connect from any location with almost any device—from smartphones, tablets and notebooks to videophones and web browsers
- Integrate tools and services within your existing IT infrastructure
- Keep capital costs low with cloud-based services
- Focus on your people and their passion

Tools for Visual Meetings

InFocus brings together the tools that let people meet face-to-face wherever it's most convenient for them—from the videophone on their desk to the big-as-life touch screen in a meeting room. Either way, all users get the same consistently high video quality that traditional, expensive videoconferencing offers.

Mondopad Giant Touch Tablet

Everything you need is at your fingertips

Collaborate and communicate with meeting participants in the room or around the world using annotation, presentation and video conferencing tools:

- Encourage interaction with a 55", 70" or 80" display with digital interactive whiteboard and document annotation
- Reap the benefits of business-class video conferencing
- Share, view and control from your notebook, tablet or smartphone
- Adapt and expand with a built-in Windows PC running Microsoft Office

MVP100 Video Phone

Video calling made affordable for everyone

Effective visual communication is now as easy as picking up the phone. You can innovate on a new level by sharing notes, demonstrating software, drawing images, and brainstorming concepts over the phone:

- Enhance collaboration and productivity of people, teams and partners within and between offices
- Deploy to the masses thanks to exceptional affordability
- Maintain face-to-face communications while cutting travel costs
- Get high-quality 10.1-inch high-definition display and a 720p camera at a low cost
- Easy plug-and-play setup

BigConnect

Video calling from your PC

Make clear, crisp high-definition video calls with Mondopad, MVP100 or other SIP end point, with this feature-packed application for your PC.

- Participate in video or audio calls to and from other SIP endpoints
- Share desktop or application and video at the same time
- Call your Skype and Lync contacts from the BigConnect application
- Windows 7 and 8 compatible

Services that Complete the Solution

To complete your ecosystem, you need services that pull the tools together. To make sure they're affordable for companies of all sizes, our services are based in the cloud, so you have no large capital outlays.

InFocus 121 Video Calling

Cloud-based calling at a down-to-earth price

InFocus 121 is a cloud-based video calling service. You get all of the power and functionality of high-quality video collaboration with none of the cost and overhead of managing on-site systems:

- Get a high-quality video dialtone on demand (always on)
- Connect one-on-one with almost any video conferencing system by dialing a phone number or email address
- Eliminate infrastructure on your premises—no H.323 Gatekeepers, SIP Proxies or Gateways to buy and manage
- The first year is free with each Mondopad, MVP100 Video Phone or BigConnect so they are ready to make calls right away
- Pay a yearly subscription fee after the first year

InFocus ConX Group Video Meeting Rooms

The most cost-effective way to videoconference

InFocus ConX provides simple, cost-effective, cloud-based video meeting rooms for your organization:

- Dial in, quick and easy
- See your co-workers and customers in real time to boost productivity
- Join in from many devices—including a Mondopad, Cisco, LifeSize or other SIP device; 3rd party apps, such as Jabber; audio-only phones; or a web browser
- Hold meeting spaces for up to 12 users

Our Reliable, Secure Network for Your Benefit

Our ecosystem runs on a fast, high-quality network owned and operated by InFocus. You get immediate, automatic provisioning—meaning the minute you plug in the Mondopad or Video Phone, it configures to our network automatically. So you can make calls right after you hook up.

Plus, you can manage your accounts, monitor your devices, manage address books, get help, and add additional services all from the infocus.net web portal.

The Power of One

InFocus gives you the advantage of the power of one—a single source for your hardware, services and network. You also have a single point-of-support contact for everything you do. Any problems, you know exactly who to call.
